Candidate Number	
Candidate Name	

Mobile phones are NOT allowed in the examination room.

MULTIPLE CHOICE QUESTION PAPER

Duration: One and a Half Hours

INSTRUCTIONS TO CANDIDATES

Read the following instructions carefully before you start answering the questions in this paper. Make sure you have a soft HB pencil and an eraser for this examination.

1. USE A SOFT HB PENCIL THROUGHOUT THE EXAMINATION.
2. DO NOT OPEN THIS BOOKLET UNTIL YOU ARE TOLD TO DO SO.

Before the examination begins:

3. Check that this question booklet is headed "**Advanced Level – 0740 Food Science and Nutrition 1**"
4. Fill in the information required in the spaces below.
5. Fill in the information required in the spaces provided on the answer sheet using your HB pencil: **Candidate Name, Exam Session, Subject Code and Candidate Identification Number.** Take care that you do not crease or fold the answer sheet or make any marks on it other than those asked for in these instructions.

How to answer the questions in this examination

6. Answer **ALL** the **50** questions in this Examination. All questions carry equal marks.
7. Calculators are allowed.
8. Each question has FOUR suggested answers: **A, B, C** and **D**. Decide on which answer is correct. Find the number of the question on the Answer Sheet and draw a horizontal line across the letter to join the square brackets for the answer you have chosen.

   For example, if **C** is your correct answer, mark **C** as shown below:

   [A] [B] [~~C~~] [D]

9. Mark only one answer for each question. If you mark more than one answer, you will score a zero for that question. If you change your mind about an answer, erase the first mark carefully, then mark your new answer.
10. Avoid spending too much time on any one question. If you find a question difficult, move on to the next question. You can come back to this question later.
11. Do all rough work in this booklet, using, where necessary, the blank spaces in the question booklet.
13. **At the end of the examination, the invigilator shall collect the answer sheet first and then the question booklet. DO NOT ATTEMPT TO LEAVE THE EXAMINATION HALL WITH IT.**

MEETLEARN.COM

1. A method of cooking food which involves the use of direct heat is?
   A Boiling
   B Steaming
   C Grilling
   D Poaching

2. Deficiency of vitamin A is;
   A Ricket
   B Anaemia
   C Scurvy
   D Night blindness

3. A protein that has a structural function in the body is called;
   A Albumin
   B Casein
   C Collagen
   D Gluten

4. A man ate puff balls and beans containing 10g carbohydrates 5g of protein and 2g fats. Calculate the energy he obtained from the meal;
   A 78 kcal
   B 60 kcal
   C 58 kcal
   D 68 kcal

5. When testing for the presence of a non-reducing sugar, the first reagent put into the test tube is;
   A Dilute hydrochloric acid (HCL)
   B Benedict
   C Sodium hydroxide
   D Ethanol

6. The burette test is based on detecting the presence of;
   A Peptide bond
   B Amino acids
   C Amino group
   D Disulphide bridges

7. Identify the area in the food composition table were coconuts are placed;
   A Nuts and wheat
   B Seeds and vegetable
   C Seeds and nuts
   D Fruits and seeds

8. Which enzyme in protein digestion activates the inactive form of another protein enzyme
   A Pepsin
   B Erepsin
   C Trypsin
   D Chymotypsin

9. The valve that prevents regurgitation of food from the intestine back into the stomach is known as;
   A Pyloric regions
   B Cardiac sphincter
   C Fundic region
   D Pyloric sphincter

10. The correct order of the movement of food in the digestive track is;
    A Duodenum, ileum, stomach, Oesophagus
    B Desophagus, stomach, Ileum, Duodenum
    C Stomach, Oesophagus, Ileum, Duodenum
    D Oesophagus, stomach, Duodenum, Ileum

11. Enzyme that changes the shape of a compound is;
    A Transferase
    B Reductase
    C Isomerase
    D Lipase

12. A protein that stimulates the liver to convert glycogen into glucose is called;
    A Insulin
    B Somatostatin
    C Glucagon
    D Pepsin

13. Food security may be influenced positively by stock holding and;
    A Increase in consumption
    B Increase in importation
    C Decrease in importation
    D Price control

14. Food security could be defined as;
    A Food must be available and cheap to all people
    B Food must be available and healthy to all people
    C Food must be available all the time for all people
    D Food must be available, accessible at all time to everyone

15. Cramps that begins at the neck and move down the left arm is called;
    A Thrombosis
    B Angina
    C Atherosclerosis
    D Stroke

16. The act of gathering food and other valuables often secretly especially for use in the future is called;
    A Artificial sacristy
    B Hoarding
    C Black marketing
    D Non availability

17. Which quality is described when potato chips is said to be crispy?
    A Texture
    B Flavour
    C Taste
    D Appearance

MEETLEARN.COM

18. A quality of an entrepreneur is;
   A Provides free services
   B Provides balance between rich and poor
   C Creates a way forward
   D Takes ricks

19. The act of making the surface of foods to glitter is;
   A Grazing
   B Greasing
   C Glazing
   D Glaze

20. Hyperglycemia is referred to as;
   A Increased thirst
   B Sugar in urine
   C Elevated blood sugar level
   D Increased urination

21. The enzyme involved in the aging and ripening of cheese is called;
   A Rennin
   B Lipase
   C Lactase
   D Amylase

22. Identify an enzyme inhibitor from below;
   A Sulphurnamides
   B Flavine Adenine Dinucleotide
   C Haem
   D Chloride ions

23. A beverage with an alcoholic content of 4%-6% is;
   A Beer
   B Spirit
   C Wine
   D Cider

24. An example of an unstable emulsion is;
   A Vinaigrette
   B Homogenized milk
   C Mayonnaise
   D Ice cream

25. In the production of margarine which process comes first?
   A The aqueous blend
   B The oil blend
   C Homogenization
   D Emulsification

26. Esters are artificial food flavours made from;
   A Carboxylic Acid and Fatty Acid
   B Glycerol and Alcohol
   C Carboxylic Acid and Alcohol
   D Steric Acid and Alcohol

27. The poor aroma and flavour during the rancidity of fats is due to;
   A Decomposition of fats to glycerol
   B Formation of peroxides
   C Peroxides decomposed to aldehydes
   D Micro-organisms producing enzymes

28. The advantage of white flour over whole meal flour is that;
   A The nutrient component is complete
   B It contains much bran
   C It contains cellulose
   D It has reduced fats

29. Semolina is produced from particles of:
   A Embryo of the maize
   B Embryo of the wheat grains
   C Endosperm of the wheat grain
   D Endosperm of the maize grains

30. Food contamination primarily results from a combination of the following factors;
   A Organic farming practices, poverty and micro organisms
   B Natural disaster, chemical and poverty
   C Poor handling of food, heavy metals and bacteria
   D Storage facilities, hygiene and cleanliness

31. Food additives that prevent foods from going rancid are;
   A Emulsifiers
   B Foaming agents
   C Preservatives
   D Antioxidants

32. The production of esters in wine formation is to improve its;
   A Colour
   B Taste
   C Flavour
   D Nutrient content

33. Substances that make food to be bright in colour are called;
   A Humectants
   B Propellants
   C Glazing agents
   D Stabilizers

34. Oral rehydration solution is mostly recommended to prevent and treat the following;
   A Cholera
   B Typhoid fever
   C Dehydration
   D Amoebic dysentery

MEETLEARN.COM

GCE Questions at www.meetlearn.com

35. Food that is cultivated without the use of chemical is said to be:
   A High in water
   B Low in water
   C Easily digestible
   D Rich in fibre

36. An advantage of backyard garden in communities is to;
   A Reduce laziness
   B Reduce taxes of unnecessary foods
   C Supplement shortages
   D Reduce occurrences of cardiovascular disease

37. A mistaken idea or opinion about food is called food
   A Fallacy
   B Fads
   C Taboos
   D Habits

38. Weight loss foods in fashion can be classified as food;
   A fallacies
   B Menus
   C Fads
   D Habits

39. The primary cause of Protein –Energy Malnutrition (PEM) in Africa is;
   A War
   B Soil infertility
   C Poor family planning
   D Poverty

40. The face of a child suffering from Kwashiorkor looks like;
   A Miserable moon face
   B Wizened face
   C Old face
   D Depressed face

41. A condition in which shortage in food intake led to lack of calories to support a child's metabolic activities is;
   A Kwashiorkor
   B Pellagra
   C Anemia
   D Marasmus

42. A lack of folate and vitamin B12 is associated with the deficiency known as;
   A Megaloblastic Anaemia
   B Aplastic Anaemia
   C Haemotytic Anaemia
   D Pernicious Anaemia

43. Which one of the following aids in the prevention of haemorrhoids?
   A Vitamins
   B Dietary fibres
   C Disaccharides
   D Triglycerides

44. A diet with much dietary fibre;
   A Promote constipation
   B Facilitate bowel movement
   C Enhance haemorrhage
   D Encourage weight gain

45. The organism most commonly used as an Indicator of water pollution is;
   A Salmonella typhi
   B Streptococcus lactis
   C Genera bacillus
   D Clostridium Butilinium

46. Sequence of treating urban water supply is;
   A Filtration-sterilization-sedimentation
   B Filtration-sedimentation-sterilization
   C Sterilization-filtration-sedimentation
   D Sedimentation-filtration-sterilization

47. A food having zero grams of carbohydrates and protein but 2 grams of lipids, supplies the body with.....energy (kcal) ;
   A 18
   B 17
   C 16
   D 15

48. In preparing slices of fish, the cooking temperature was maintained at slightly, below the boiling point of water. This cooking method is called;
   A Grilling
   B Simmering
   C Poaching
   D Braising

49. A specie of yeast that is used to ferment grape juice into wine is;
   A Saccharomyces ceravisae
   B Azoto yeast
   C Zymase group
   D Saccharomyces ellisoidens

50. An uncooked dough made from a mixture of flour, fat and some water is;
   A Pastry
   B Batter
   C Paste
   D Pastis
